

Welcome to BSP

The purchase of a home is probably the largest single investment you will ever make.

Our company, BSP Building Systems Performance can help you by reducing any concerns you may have about the technical condition of your home. We will provide you with all the information you need to make the right decision bringing peace of mind during the purchase transaction.

Visual inspection and evaluation

A home inspection is an objective visual evaluation of the physical condition and performance of systems and components of a home from the roof to the foundation.

An experienced inspector will examine more than 1,000 items using the most advanced testing equipment to assist you in knowing as much as possible about your prospective home.

Like the doctor examining a patient, the home inspector examines the home to assess its condition and health.

Standards of Practice

CAHPI is the national Association of home and property inspections and OAHI Ontario Association of Home Inspectors is the CAHPI member in Ontario and formed in 1987.

OAHI is the voice for the inspection profession in Ontario and is dedicated to enhancing the technical skills and professional practice of Home Inspectors, and maintaining high professional standards through education and discipline.

OAHI promotes excellence within the profession by following the OAHI standards of practice which provides inspection guidelines, and the OAHI Code of Conduct which defines the member's responsibility to act in a strictly fair, impartial, and professional manner.

Membership in OAHI is an earned credential and the best evidence of an inspector's competence and professionalism. The OAHI is at the leading edge of the North American profession as the first self regulating professional home inspection organization and the RHI designation (Registered Home Inspector) is the recognized benchmark for competency for private practitioners in Ontario.
